Do they suggest any incompatible arrangements where compatibility appears to be required? Is the handling of any conflicting overlaps between the functions resolved in a workable manner?

Association of general corporate judicial person telecom service is an industry group mainly consisting of ICT related companies in Japan.

We are positive about ICG's proposal on the stewardship transition of the IANA functions of ICANN, considering business activities of companies, consumers' benefit, development of local area and public welfare. These stakeholders have benefited from the open and transparent Internet for many years and such Internet should be sustained into the future. We are sure ICG's proposal is aiming to manage the Internet resources in better multi-stakeholder model and contribute to the sustainable Internet.
