

Name: Bastiaan Goslings

Submission ID: 46

I first of all want to show my support for the proposal submitted by the CRISP Team on behalf of the Number Community with regard to the future stewardship of the IANA number functions.

Now that the IANA Stewardship Transition Coordination Group (ICG) has published a first draft, combining the proposals of all three IANA constituencies (numbers, names and protocol parameters), I'd like to state that in my opinion this draft ICG IANA Stewardship Transition Proposal is in line with the original criteria as set by the NTIA and that it was developed in a bottom-up and transparent process by the respective communities.

I furthermore would like to echo the CRISP Team's Response, dated the 26th of August, to the ICG's Call for Public Comment on the IANA Stewardship Transition Proposal.

With kind regards,

--
