### Identifying Information

*\* Indicates required field*

First Name: **Shreedeep**

Last Name: **Rayamajhi**

Email Address: REDACTED

Country/Economy: **Nepal/ Asia Pacific**

Organization **Activist and Blogger**

**Do you have any general comments for the ICG about the proposal?**

**I strongly believe the proposal forwarded by the ICG is very compatible to practice a multistakeholder Internet governance model which will further help in the growth and development of internet. The ICG proposal is workable in establishing a definite stability in the overall IANA functions.**

**The IANA function needs to work with a more proactive environment harnessing the core values of dynamics of internet (security, stability and openness).**

**The dynamic of internet is changing and with this change the nature and values of control mechanism should change. Internet today is the asset and property of the global world which needs to be controlled and regulated by Multistakeholder approach balancing and bridging the gaps.**

**The concern should not be about the controlling but lessening the gaps in between the developed and the developing countries flowing the rule of standardization.**

**Bridging the gaps is an important step and ICG's proposal can be a pavement for the process. Though there are more scope of improvements but it can be a new beginning.**

**Cheers**

**Shreedeep Rayamajhi**
